Epic Games have received many requests from the community to make project Infiltrator available, and now they finally release it for free for use in UE4 projects. Epic State Game: Infiltrator is a high-end demonstration of Unreal Engine 4's rendering and cinematic capabilities. Originally shown at GDC 2013, it is still highly representative of the capabilities of high-quality PC graphics processors. Please note that UE4's approach to physically based visualization has evolved since it originally debuted in Infiltrator, so these assets will require customization when used in a new project with background coverage. For more information see other Unreal Engine 4 projects noteworthy include Magnificent Absention, a new name for Horror Survival inspired by true survival horror greats such as Resident Evil, Eternal Darkness and Silent Hill so fans can expect a mix Challenge, intense gameplay, and exciting environments. ADRIFT, three-one zero in a narrative-driven survival game that takes the genre breathlessly breathless Dontnod and publisher Focus Home Interactive have announced Vampyr, a new role-playing game based on Unreal Engine 4 for PlayStation 4, Xbox One and PC. The source code of the demo, as well as all assets can be downloaded from Epic Game Launcher, under the Learn tab: You can get Epic Game Launcher from this page. I downloaded 5GB of this demo and downloaded it with Unreal Engine 4.9.1. My laptop (with GTX 960M/4GB GDDR5) stuck for about 10 minutes or more at 95% download. In the task manager I saw the source of this slowness: a compilation of all the shaders... But my laptop seems to have some trouble handling this demo: I'll try later to install Infiltrator on a more powerful system with more memory, because this demo seems amazing! UPDATE (2015/09/21): I finally managed to run this whooping cough demo. I've updated the graphics driver (NVIDIA R355.82) and that's it. Then my laptop can run it! The number of shaders to compile is just crazy. The next screenshot shows 4197 shaders should be composed! And now another 3307 shaders are waiting for compilation. But this is not a problem, because UE4 can exert effects (on the next screenshot, particles of quad bikes) without the final shaders: All shaders are now made up ... (source) (source) (source)
